

## INSTRUCTIONS

### STORAGE

- Always store flat in a dry environment

### Use

- Place TheFlowerCage™ flat on bench
- Check each end of stitch-lines and tighten by twisting if necessary

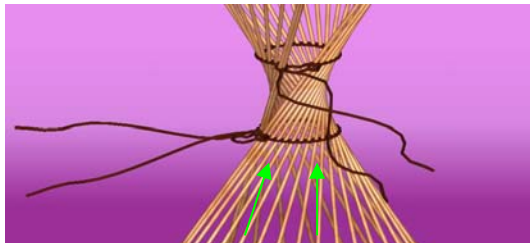

Stitch-Line

Check ends twisted and tighten by twisting if necessary

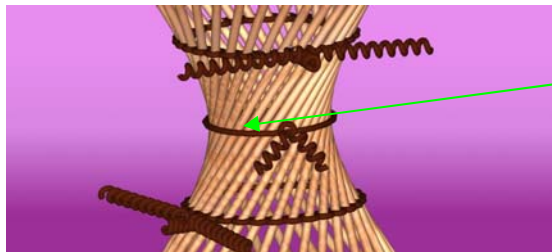

Stretch in both directions

- Take hold of both ends of one stitch-line and gently stretch
- Repeat on other stitch-line
  - This tightens the stitches around the bamboo rods
- Now place ready made dry aqua-packed arrangement diagonally across the two stitch lines at the tie-point
- Wrap cage around display and secure one end loosely, then the other

- Put one hand up inside the cage (bottom end) and gently rotate your fingers around the aqua pack to free the cellophane and encourage the cage to turn

- Place on bench and firmly secure each end, adjust arrangement and fill aqua-pack
- Take a paper covered wire or similar and tie a waist around the cage. Twiddle wires around pencil or similar

Waist point
